## Why choose AudioFetch?

AudioFetch is the most universal and expandable system in the market. Manufactured by Broadcastvision Entertainment, we offer AudioFetch Signature which is a fully expandable system allowing you to connect up to 512 audio devices and 10,000 users and AudioFetch Express which is a single channel unit that is great for facilities needing to connect less than 8 audio devices and it has built-in WiFi if needed.

-  **REAL-TIME AUDIO STREAMING**  
Guaranteed low audio latency. Smartphone audio and TV video sync together.
-  **MULTIPLE INPUT TYPES**  
Accepts 3 types of audio inputs (analog, optical or digital coax).
-  **SMARTPHONE/TABLET READY**  
Download the Free App from Google Play or iTunes. Works with Apple and Android devices.
-  **EASY TO USE**  
The AudioFetch app is simple to use and appropriate for all ages.
-  **HASSLE-FREE INSTALLATION**  
Plug-n-play installation using your existing Wi-Fi or use the WiFi built into the Express.
-  **ESTABLISHED TECHNOLOGY**  
Developed in 2015, AudioFetch is an established technology and it manufactured by Broadcastvision Entertainment.
-  **FROM 1 TO 512 AUDIO INPUTS**  
Each audio input has dedicated audio processor for maximum performance and scalability.
-  **UP TO 10,000 USERS**  
The AudioFetch Signature system can be expanded to handle up to 10,000 connected users.
-  **INTEGRATE WITH EXISTING WIRELESS**  
Easily integrate AudioFetch with your existing 900MHz, FM or Sports Select system found in many fitness centers & restaurants.

Since 2015, our AudioFetch product has been used in multiple applications. Any device that has an audio output can be easily connected to AudioFetch so customers can listen to the audio using their smartphone or tablet.

### FITNESS CENTERS

Give exercisers the opportunity to listen to TV audio throughout the club. Great for TVs in the lobby and locker rooms as well.

### RESTAURANTS

If you have a TV in your restaurant then AudioFetch is a perfect way to broadcast the audio without disturbing others.

### SPORTSBARS

Customers can now listen to the audio from any TV and experience the game the way it should be.

### CHURCHES

A great solution for the hearing impaired and also most recently drive-in type service.

### MEDICAL OFFICES

Use in your lobby while customers are waiting. For dental offices, a great solution to keep customers entertained during procedures.

### HOTELS

Connect AudioFetch to your TVs in the lobby or restaurants.

### HAIR/NAIL SALONS

A great way to keep customers entertained during the service you provide.

### AIRPORTS

Airports can benefit from AudioFetch by connecting to the TVs they have throughout the terminal.

### SPAS & WELLNESS CENTERS

Install AudioFetch in your waiting areas so people can listen to music or watch TV without disturbing others.

### CASINOS

A great solution for sportsbook areas and also any TVs used in restaurants.

### BREAK ROOMS

Now you can install multiple TVs in the break room to satisfy all of your employees and audio can be heard through their personal smartphone.

### COUNTRY CLUBS

AudioFetch can be used in waiting areas, the fitness room or any restaurants that have TVs.

### DRIVE-IN APPLICATIONS

To attract more customers, many restaurants, sports bars and live events are hosting a drive-in concept. AudioFetch is the solution for sending audio.

### CURBSIDE PICKUP

Customers can listen to a message when they pull up to pick up their food or merchandise. You can advertise specials while you explain the pick-up process.

### HEARING IMPAIRED

Many churches across the country are already using AudioFetch for the hearing impaired. It's simple to use for the customers and the system is easier to manage.

### COFFEE SHOPS

A great solution for keeping the noise levels down and keeping customers entertained.

### STADIUMS

Now you can listen to the play by play announcing on your phone.

### TOUR COMPANIES

AudioFetch Express is a great solution for tour companies wanting to communicate with groups of people.

### AND MORE...

The applications are endless since any device with an audio output can be connected to AudioFetch so customers can listen to the audio on their smartphone or tablets.

# audiofetch Signature System

The AudioFetch Signature system is a fully expandable system with flexibility regarding the amount of audio devices and user connections. The AudioFetch Signature can be easily mounted in a rack or on a shelf and can connect to any device that has an audio output including TVs, projectors, sound boards, mixers, cable/satellite boxes and more.

## AudioFetch Signature

### Features:

16 Channel/Audio Input System

- ✓ The system can support a minimum of 4 audio sources and each enclosure can support up to 16 audio sources. You can add additional units to achieve up to 512 different audio sources.
- ✓ Supporting 250 users is standard for an AudioFetch Signature system but you can easily extend the amount of users to 10,000 with additional boards.
- ✓ Easy to connect. Simply connect AudioFetch to the audio output of the audio device and then plug AudioFetch into the WiFi router/network. Internet connection is not required to operate AudioFetch.
- ✓ Free app on Google Play and iTunes.
- ✓ Guaranteed low audio latency. Smartphone audio syncs to live video or audio being broadcasted.
- ✓ No Monthly Fees.

### EXPANDABLE AUDIO

Our 4 channel card slots make it easy for facilities to expand. Simply add additional cards when needed.

### USER FLEXIBILITY

The amount of users connected to the system can be expanded from 250 to 10,000.

### CUSTOM CABLES

We provide free custom audio cables and Ethernet cable based on your requirements.

### PLUG-N-PLAY

Plug-n-play installation using your existing WiFi. No custom configuration required.

### MULTIPLE INPUT TYPES

Each one of our channels accept 3 types of audio inputs (analog, optical or digital coax) to ensure compatibility.

# audiofetch Express System

The single channel AudioFetch Express is designed for facilities not needing to connect more than 8 audio sources and want the flexibility of built-in WiFi to create your own internal network or wirelessly connect to an existing network. The AudioFetch Express can be easily installed and receive power from a USB output or standard power outlet and can connect to any device that has an audio output including TVs, projectors, sound boards, mixers, cable/satellite boxes and more.

## AudioFetch Express

Single Channel AudioFetch Express

### Features:

- ✓ The AudioFetch Express is a single channel unit. Add up to 8 units in a facility. Can be used along with AudioFetch Signature.
- ✓ The system can support up to 30 users when using the WiFi built-in to broadcast it's own network or wirelessly connect to an existing network. Up to 100 users can be connected when hardwired to the network or a separate router.
- ✓ Easy to connect. Simply connect AudioFetch Express to the audio output of the audio device and for power use a USB output or a standard power outlet. Internet connection is not required to operate AudioFetch Express.
- ✓ Free app on Google Play and iTunes.
- ✓ Guaranteed low audio latency. Smartphone audio syncs to live video or audio being broadcasted.
- ✓ No Monthly Fees.

### EXPANDABLE

Install up to 8 units in one facility. Use with AudioFetch Signature for additional channels.

### CONNECTION FLEXIBILITY

Use the WiFi built-in to wirelessly connect to an existing network, create your own network or hardwire to a network/router.

### CUSTOM CABLES

We provide free custom audio cables and Ethernet cable based on your requirements.

### PRE-PROGRAMMED

We will pre-program the units if you know what connection option you want. Otherwise, you can easily program onsite.

### MULTIPLE INPUT TYPES

Each unit accepts 3 types of audio inputs (analog, optical or digital coax) to ensure compatibility.

## NEW FEATURES!

When you purchase an AudioFetch system, you will receive a link with login credentials so you can customize the app. No additional cost or monthly fee!

### Features:

- ✓ Add your company logo.
- ✓ Customize the colors of the app.

# Integrate AudioFetch Into Your Own App

We provide two great options for integrating AudioFetch into your own app.

### Option 1

Native integration using the free AudioFetch SDK

### Option 2

Code snippets for simple app integration, without the SDK

## Some of our Testimonials

"I was excited about all the features and the ability to use the same device for inside the church and for tours. I am very impressed with how easy AudioFetch was to set up and use. My hard-of-hearing parents felt it worked well also. Integrating AudioFetch into our church audio system was a breeze. We were able to get multiple users up and running quickly. For any questions we had, we received excellent support. Highly recommended!!"

– DAVID FROBISH, OUR SAVIOUR'S UNITED METHODIST CHURCH

"AudioFetch was easy to install myself. They provided all the cables and the system really is plug-n-play. The customer support even included providing the necessary splitter cables to keep my existing cardiotheater-style system functional while adding AudioFetch."

– JOE WIRKUS – OWNER, SUPREME HEALTH & FITNESS

## App Usage Analytics

### The DOGHOUSE

The AudioFetch portal called DogHouse allows you to easily post ads, track usage metrics and run reports. This is a great tool for those of you considering utilizing the ad portal to sell advertising space for additional revenue.

### Included at no additional cost

Your log-in credentials with temporary password are included with your order. Easy to read dashboard allows you to manage your ads or view reports.

## AudioFetch Promotional Materials

When you purchase an AudioFetch system, we supply you with marketing material to inform and encourage your customers to use the system. Custom marketing material available.

8.5 x 11" Customizable Flier. Custom fliers available.

AudioFetch Marketing Flier Example

TV Tune to signs, table tents, hand out cards & cardio clings.

## FAQ - Frequently Asked Questions

### What is the difference between AudioFetch Signature and AudioFetch Express?

Both systems work the same way with regard to sending audio over WiFi but the Signature is one unit that handles multiple audio inputs where as the Express unit is a single unit and also has built in WiFi if needed.

### Can I connect it to my existing WiFi network?

Yes, AudioFetch is designed to connect to your existing network. Both the AudioFetch Signature and Express can be hardwired to your network. Since the Express has built-in WiFi, you can program to connect to your network wirelessly.

### Does my WiFi network need to be connected to the internet to work with AudioFetch?

AudioFetch does not require your network to be connected to the internet. However, in order to have access to customize or run ads on the app, you will need an internet connection since we store these images on an external server.

### Can I use both the AudioFetch Signature and Express together in one facility?

Yes, you can use both systems in one facility and in fact that usage is very common. For example, let's say you have 4 TVs in a row on a wall but then you also have one TV in the lobby. You could use the AudioFetch Signature 4 channel system for the 4 TVs and AudioFetch Express for the TV in the lobby.

### What type of audio connections does AudioFetch accept?

Both the AudioFetch Signature and Express has 3 types of audio inputs. Analog, digital optical and digital coax. Our analog input is 3.5mm but we have adapters that we can include at no additional charge.

### Is it true that you include the audio cables at no additional charge?

We include the following audio cables with each order: power supply, 6'- 3.5 to 3.5mm cable, and one 25' Ethernet cable. If you need custom cable lengths or different cables (for example: digital optical, digital coax or RCA cable) just ask that we can include at no additional charge.
