ReAX™ IP Control System

Made in the USA

The RXC-4 is the non-proprietary and non-platform specific IP control system technology from Aurora Multimedia. This Quad Core Processor packs plenty of power and memory to not only take on current tasks, but many future ones as well. The RXC-4 has the ability control analog room audio eliminating external volume control devices.

Having many ports is important as well. The RXC-4 has a variety of ports to control many different types of equipment, such as, but not limited to, serial ports for devices like projectors, IR ports for DVD players, relays for screen or shade control, and I/O ports for door and motion sensor devices.

Features:

- **Quad Core Processor 16Hz Per Core**
- **1GB 1066 DDR3 RAM/8GB Flash**
- **IP Control Engine**
- **Web Server, FTP, Browser**
- **WACI Event Manager**
- **4 Bi-Directional RS-232**
- **4 IR/Serial Ports (TX only RS-232)**
- **4 I/O with A/D**
- **4 Relays**
- **USB 2.0**
- **Stereo Line In/Out**
- **Dual 10/100/1000Mbps LAN (Port 1 PoE PD)**
- **Status LEDs**
- **Front Keyboard**
- **1RU Half Rack for Single and Dual Mounting**
- **Low Power Consumption**

Software tools are available for free once logged into the customer portal. Core Studio is a software tool to create user interfaces and a drag and drop code creator to take control of just about anything with ease.
