

16x16 Modular Matrix Switch VM1600A

The ATEN Modular Matrix Solution Series comprises the VM1600A/VM3200 Modular Matrix Switch in tandem with a range of hot-swappable I/O boards. The solution offers real-time control and advanced access to manage 16/32 video sources and 16/32 displays simultaneously, through modular I/O boards in a single chassis. Empowered by ATEN Seamless Switch™ technology, the VM1600A/VM3200 video matrix switches incorporate a speed-progressive video switching function and a unique scaler that integrates seamlessly with video wall systems.

The ATEN Modular Matrix Solution is easily expandable and ideal for large-scale A/V applications such as broadcasting stations, traffic and transportation-related control rooms, emergency service centers, and any application that requires customizable, high-speed A/V signal routing.

Boasting a sophisticated and intuitive design to deliver the best audio/visual distribution and control, reliability and lowest maintenance costs, the solution also incorporates ATEN's Red Dot Award-winning GUI that can be accessed from anywhere over a network or the internet. Configuring a video wall or digital signage installation has never been easier.

Features

- Connects any of 16 video sources to any of 16 displays in combination with ATEN Modular Matrix I/O Boards
- Multiple means for system configuration including front-panel pushbuttons, RS-232/422/485 control, and Ethernet connections for web GUI or Telnet
- 4K resolutions up to UHD (3840 x 2160) and DCI (4096 x 2160) with refresh rates of 30 Hz (4:4:4) and 60 Hz (4:2:0)*
- Scaler features a (4K) video scaling function to convert input resolutions to the display's native resolutions*
- Seamless Switch™ features close-to-zero second switching for continuous video streams, real-time switching, and stable signal transmissions*
- Video wall allows you to create custom video wall layouts via intuitive web GUI*
- Calendar-based scheduling allows profile playing based on the pre-set schedule and RTC
- EDID Expert selects optimum EDID settings for smooth power-up, high-quality display, and use of the best resolutions across different screens
- Audio-enabled HDMI audio can be extracted and stereo audio can be embedded*
- Bi-directional RS-232 channel allows you to control the connected serial devices simultaneously through the web GUI
- Supports redundant power module for higher reliability
- Hot-swappable design for I/O boards, fan module, and power supplies for easy maintenance and higher reliability
- Optional redundant power supply ensures reliability for mission-critical applications
- Long-Reach mode up to 1080p@150m enables extended AV transmission using the HDBaseT™ Input/Output board with ATEN HDBaseT™ Class A Video Extenders
- HDCP 2.2 Compatible*
- HDMI: 3D, Deep Color, 4K*
- Consumer Electronics Control (CEC) supported*
- Rack mountable (6U design)

Note:

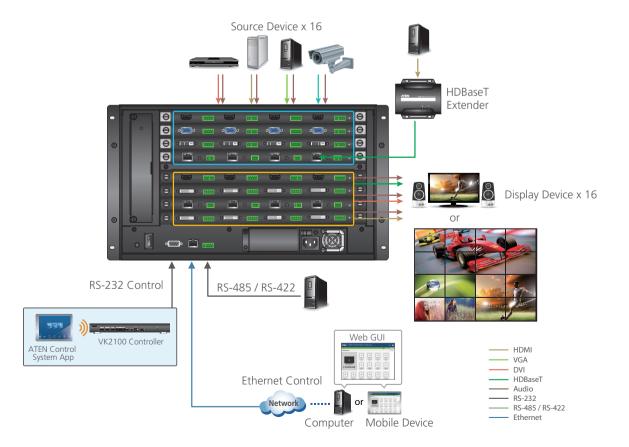

- 1. The availability of the features with "*" depends on which I/O board is inserted.
- 2. When Seamless Switch[™] is enabled, 3D, Deep Color, or interlace (i.e., 1080i) formats will not be supported. To use these formats, make sure to disable Seamless Switch[™].
- 3. Videos may not display within range when Seamless Switch™ or Video Wall is enabled, in which case please adjust the display settings on your device.

Highlights

| Modular Convenience with Flexibility | The VM1600A is fully flexible and expandable with modular I/O boards that provide plug-n-play connectivity with an extensive line of analog and digital A/V equipment that offers great flexibility for customization and future-proofing. The removable front panel, modular interior PCBs, hot swappable I/O board, power, and fan modules make repair and replacement easier than ever, without any interruption to services. |
|---|---|
| Smooth and Seamless Viewing Experience | ATEN Seamless Switch™ technology is powered by an exclusive seamless engine that features close-to-zero second switching for continuous video streams, real-time switching, and stable signal transmissions. This high-performance engine processes A/ V signals by executing EDID and HDCP handshakes simultaneously for both the source and display – scaling all inputs for the best output resolution. By setting the output clock timing and using a frame buffer to retain input signal information, you're always guaranteed the fastest output and pleasant viewing experience. |

| | The Video Wall functionality is featured with a unique scaler that utilizes ATEN FPGA technology to unify various video input signals and render optimum output resolutions on displays with uncompromised precision. With the intuitive web GUI which has won the Red Dot Interface Design award, you can easily configure up to 32 profiles and customize the display layouts. Multiple displays can be easily configured to show video as a single large screen in various layouts – to see "what you want, how you want it". | |
|------------------|--|--|
| Video Wall | 02 02 01 07 02 02 02 01 07 02 02 02 16 05 00 05 06 06 05 | |
| Audio Separation | The VM1600A provides the capability to separate audio signals from their corresponding video signals, including both HDMI audio extraction and stereo audio embedding. This allows the stereo audio and video signals from one source device to be switched and sent out to different destinations. | |

Note :

a. 4K resolutions are only available when the Scaler is disabled. When the Scaler function is implemented, the highest resolution available is 1080p. The Scaler function is enabled by default.

b. HDMI audio signal can be extracted as stereo audio. Stereo audio can be embedded into the HDMI audio output.

c. For the VM8514, certain functions are only available when used with the appropriate extenders.

d. Long Reach mode (1080p@150m) is only available when the HDBaseT™ Input/Output board used with ATEN HDBaseT™ Class A Video Extenders.

Available Accessories

| VM-PWR460 | Video Matrix Power Module |
|-----------|---------------------------|
| | |
| | |

| Input voltage | 100 - 240Vac |
|-------------------|---------------|
| Power Consumption | Max.Load 460W |
| Operating temp. | 0° to 40° C |

Rack Mount Kits (Optional)

| Easy Installation Rack Mount Kit | Rack Depth |
|----------------------------------|--------------|
| 2X-026G (Short) | 42 to 70 cm |
| 2X-027G (Long) | 68 to 105 cm |

1. Screw the mounting brackets to the rack, as shown in the diagram.

VM-FAN554 Video Matrix Fan Module Airflow 55.2 cfm Operating voltage 10.2 - 12Vdc -10° to 60° C

2. Slide the unit along the brackets, then screw and secure the front panel to the rack.

Operating temp.

Specifications

| Function | VM1600A | | | |
|----------------------------|---|--|--|--|
