

## POC DIP switch on the HDBaseT Card

There's a 4-pin black DIP on the HDBaseT card, it's able to set up the POC function as 12V, 24V and POC function off.

**Set POC to 12V:** Have the DIP switch A,B up, and the C,D to down position

**Set POC to 24V:** Have the DIP switch A,C down, and the B,D to up position

**POC function OFF:** Have the 4-pin DIP switch set to the middle position
