

BT5.0 Bluetooth

Converts Bluetooth audio to Dante/AES67 network digital signals

PoE Power Supply

Supports both power supply and audio transmission via an Ethernet cable

Signal Interface

Supports Bluetooth wireless and analog audio interfaces

Real-time Display

Easy pairing with real-time status display

Introduction

The is a wall-mounted panel that supports conversion between Bluetooth/stereo audio signals and Dante/AES67 network digital signals, with Bluetooth signal set as the first priority.

It adopts PoE power supply. By connecting to mobile phones, tablets, and other devices via Bluetooth, it converts the received audio into network digital signals for transmission.

The panel is powered by PoE, allowing audio transmission and power supply through a single Ethernet cable, enabling simple wiring and stable transmission.

A single touch button controls Bluetooth pairing with the device and displays the connection status. The device name via Bluetooth can also be changed.

Features

- Bluetooth and Dante/AES67 Conversion.
- High-Priority Bluetooth.
- PoE Power Supply.
- Easy Bluetooth Pairing.
- Customizable Bluetooth Name.
- Open API Support.
-

Specification

Name	WolfPack Dante Converter Wallplate Panel
Bluetooth Channels	2 Channels
Dante Channels	2 Channels
Stereo Channels	2 Channels
Sampling Rate	44.1/48kHz
Data Depth	24 bit
Power Supply	Class 1 802.3af PoE
Device Latency	<2ms
Dimension (Inch)	4.5 x 2.75 x 1.55 Inch
Power consumption	2W
