# System Connection and Application

## 1.1 System Connection

## 1.2 AI-Box1 IO Interface

# Chapter 2 Support Devices

## 2.1 Shure

- Shure MXA310 Table Array Microphone
- Shure MXA910 Ceiling Array Microphone
- Shure MXA920 Ceiling Array Microphone

## 2.2 Sennheiser

- Sennheiser TeamConnect Ceiling 2 (TCC2) Ceiling Microphone

**<Note>** When using TCC2 with CamConnect, please set and configure the channels on the Sennheiser Control Cockpit software first.

CamConnect is divided into 8 equal parts according to Sennheiser's horizontal angle of view. They correspond to CamConnect Azimuth Angle 1 to 8.

If the forbidden area is enabled on the Sennheiser Control Cockpit software, the corresponding position of CamConnect will also be affected. Example: If the forbidden area is set to 0° to 60°, the audio signal from 0° to 45° of CamConnect Array Azimuth 1 and 45° to 60° of Array Azimuth 2 will be ignored.

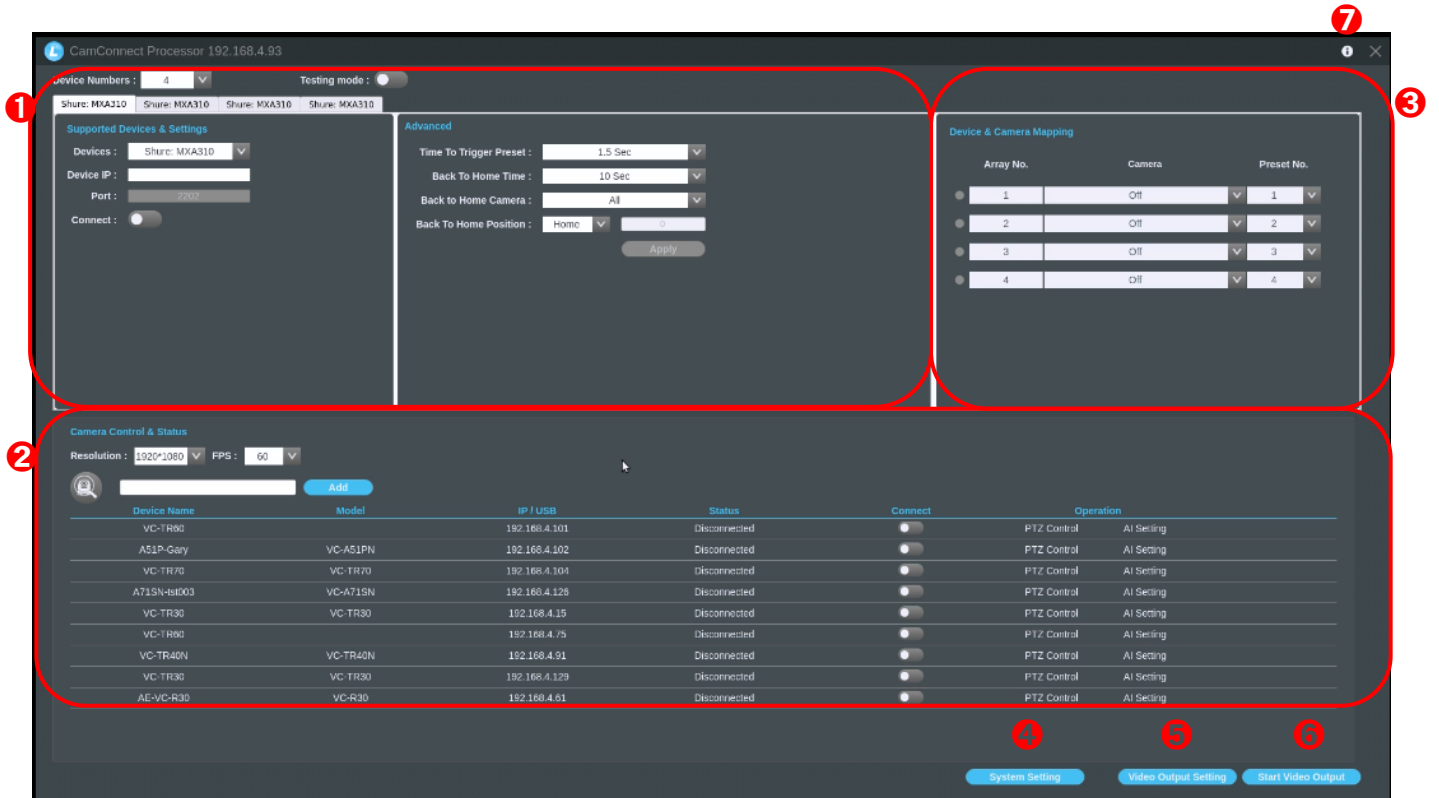

## 2.3 Nureva

- HDL300 Audio Conferencing System
- HDL310 Audio Conferencing System
- HDL410 Audio Conferencing System

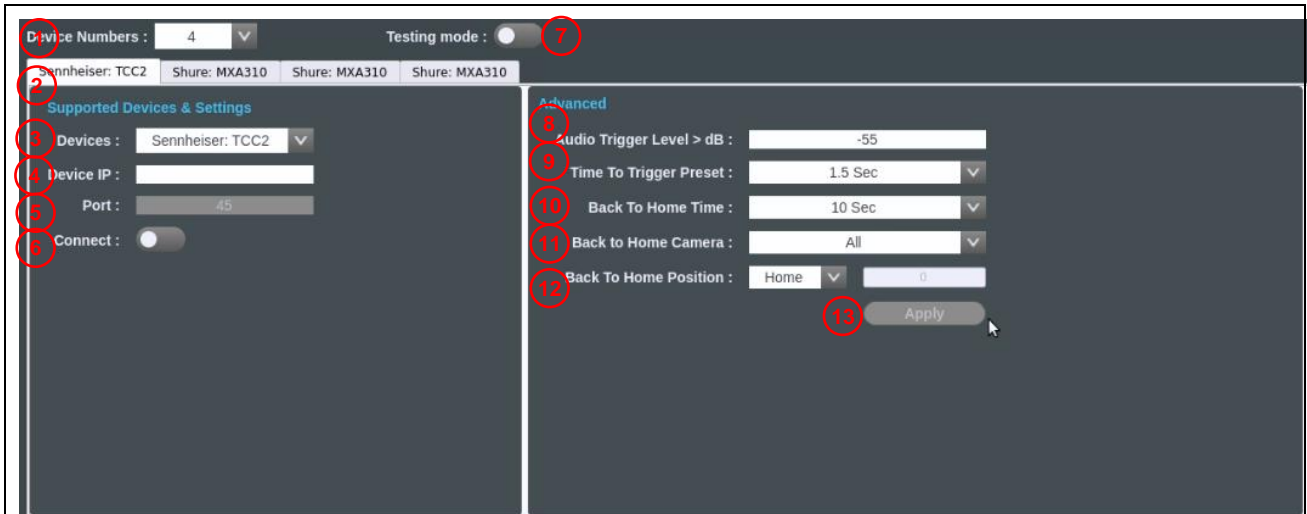

## 2.4 Yamaha

- Yamaha RM-CG Ceiling Array Microphone

# Chapter 3 Operation Interface Description

## 3.1 Microphone Setting

No	Item	Function Descriptions
1	Device Number	Select the desired number of microphones to connect
2	Device List	Display the devices according to the Device Numbers
3	Devices	Select Microphone Device
4	Device IP	Enter the IP address of the microphone
5	Port	Display based on the connected devices <ul style="list-style-type: none"> <li>▪ Shure : 2202</li> <li>▪ Sennheiser : 45</li> </ul>

		<ul style="list-style-type: none"> <li>▪ Nureva : 8931</li> </ul> <p><b>&lt;Remark&gt;</b> Only Nureva allows customized input of PORT</p>
6	Connect	Enable/Disable microphone connection
7	Testing Mode	<p>Enable/Disable Setting mode</p> <p>When the Setting mode is enabled, the microphone can receive signals, but it will not trigger the camera to the preset position.</p> <p>Enabling this mode is recommended when setting the preset position, to prevent microphone from interference from other sounds, triggered to unintended positions.</p>
8	Audio Trigger Level > dB	<p>Triggered only if audio source exceeds the preset dB</p> <p><b>&lt;Remark&gt;</b>For Sennheiser/Nureva only</p>
9	Time To Trigger Preset	<p>Audio Reception Delay Settings</p> <p>When a second sound trigger occurs, there will be a delay in calling the preset position based on the configured duration in seconds.</p>
10	Back To Home Time	<p>Back To Home Time Settings</p> <p>If there is no audio input at the venue, it will trigger, after the set seconds, and return to Home</p>
11	Back to Home Camera	Select one camera or all to back to home.
12	Back To Home Position	Home Position Setting
13	Apply	Setting completed; click Apply

### 3.2 Camera Control & Status

No	Item	Function Descriptions
1	Resolution/ FPS	Resolution/FPS Settings (must match the camera output settings)
2	Refresh/ Add	<p>Click  to search for the device again or manually enter the specified IP, and click <b>[Add]</b> to add it</p> <p>※ Please ensure that the camera and AI-Box1 are on the same network segment.</p>
3	Device Name	Check the camera name in the same network segment.
4	Connect/ Disconnect	<p>Click <b>[Connect]</b> to establish a connection with the camera or to cancel the connection</p> <p>The connected camera will be highlighted in blue</p> <ul style="list-style-type: none"> <li>▪Disconnected:</li> </ul> <ul style="list-style-type: none"> <li>▪Connected:</li> </ul>
5	PTZ Control	<p>Click to enable PTZ control</p> <p>Refer to <a href="#">3.2.1 PTZ Control</a> for function description</p>

6	AI Setting	<p>Enable/Disable AI People Tracking</p> <ul style="list-style-type: none"> <li>▪Center Stage: After triggering to the preset position, the tracked person will be positioned in the center of view and tracking will stop after 5 seconds</li> <li>▪Continuous Tracking: The system will continuously track a person and keep them positioned in the center</li> </ul>
---	------------	---

### 3.2.1 PTZ Control

No	Item	Function Descriptions
1	Preview window	Display the screen currently captured by the camera
2	L/R Direction	L/R Direction / Normal
3	Mirror / Flip	Set image mirroring/ flip
4	Pan/Tilt/Home	Adjust the Pan/Tilt position of the camera screen Click <b>[Home]</b> button to return to its central position
5	Preset setting	Click the number keys directly to call the preset <ul style="list-style-type: none"> <li>• Save preset: Click <b>Set</b> first and then a number key</li> <li>• Clear preset: Click <b>○</b> first and then a number key</li> </ul>
6	AF/MF	Switch to Auto/Manual Focus. Focus can be adjusted in Manual
7	Zoom	Zoom In/ Zoom Out ratio
8	Exit	Exit the PTZ Control page

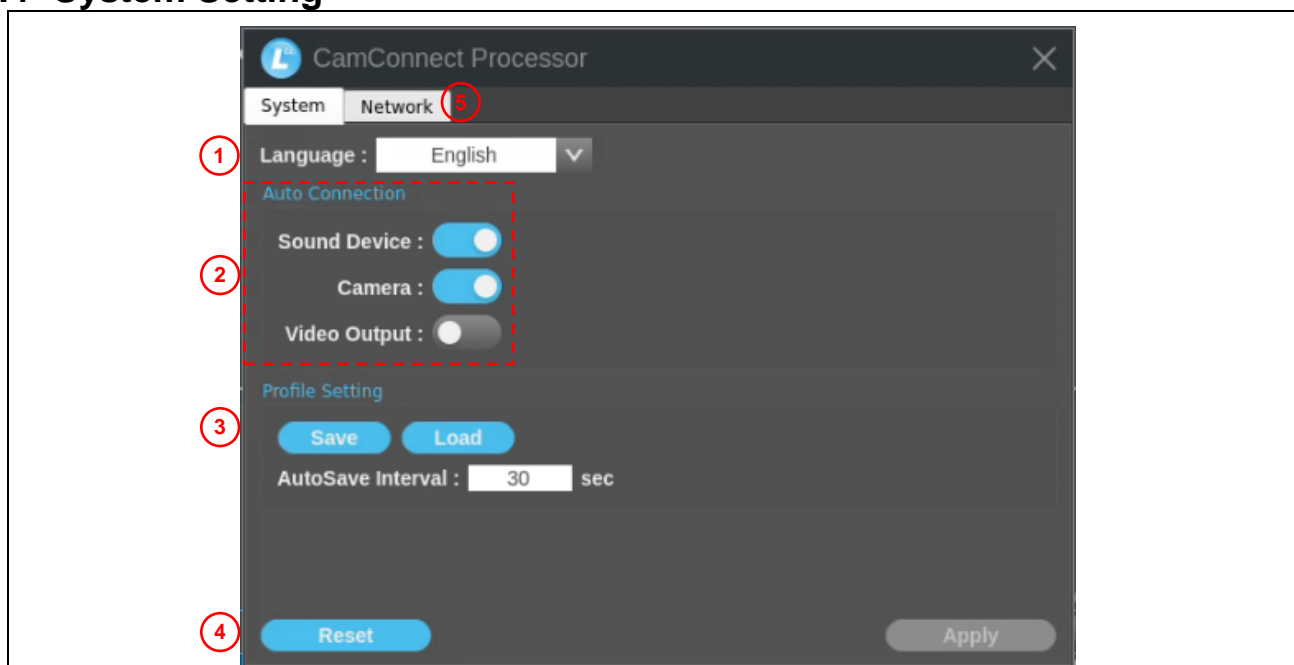

### 3.3 Microphone orientation and camera preset relationship setting

After the microphone device is connected, the camera can be controlled to turn to the corresponding preset position according to the microphone detection position.

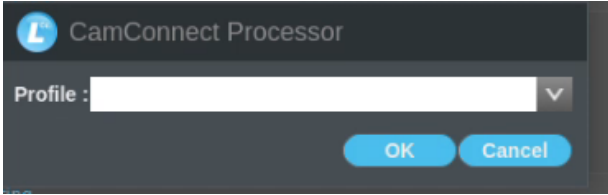

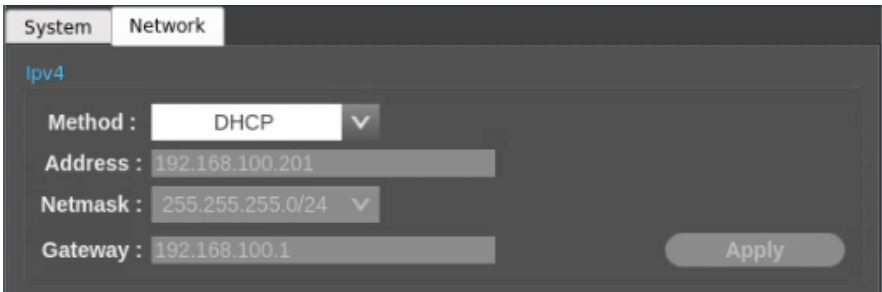

No	Item	Function Descriptions
1	Indicator	This indicator shows the status of microphone signal reception. (A green light indicates successful reception)
2	Array No. Azimuth Angle	<ul style="list-style-type: none"> <li>Array No.: For Shure models:</li> <li>Azimuth Angle: Applicable to Sennheiser, Nureva, and Yamaha models. The angle can be manually adjusted</li> </ul>
3	Camera	Select the desired camera from the dropdown menu
4	Preset No.	Select the preset position for the camera from the dropdown menu

### 3.4 System Setting

No	Item	Function Descriptions
1	Language	English
2	Auto Connection	Auto connection settings <ul style="list-style-type: none"> <li>Sound Device: Microphone</li> </ul>

		<ul style="list-style-type: none"> <li>▪ Camera: Camera</li> <li>▪ Video Output: Automatic image output</li> </ul>
3	Profile setting	<ul style="list-style-type: none"> <li>▪ Import and export the config file.</li> <li>▪ Set the auto saving time.</li> </ul> 
4	Reset/ Apply	Reset/Apply your settings
5	Network	 <p>Ethernet Setting. When it is set to Static IP, the setting can be modified. Once the settings are completed, click Apply.</p>

### 3.5 Video Output Setting

		
No	Item	Function Descriptions
1	Video Output Mode	Set the Output Mode to either UVC or HDMI
2	Video Output Layout	<p>Configure the layout of the video output according to the provided reference in section <a href="#">3.5.1 Video Output Layout</a></p> <ul style="list-style-type: none"> <li>▪ Cross: 4-split screen</li> </ul>

		<ul style="list-style-type: none"> <li>▪ PBP: Picture by Picture screen</li> <li>▪ Crop: Screen cropping function</li> </ul> <p><b>&lt;Remark&gt;</b> Choose either Cross/PBP only</p>
3	Seamless Switching	<p>Enable/disable the microphone connection function The system is set up for single screen output, and the screen switching is triggered by the microphone signal.</p>

### 3.5.1 Video Output Layout

	1 camera in connection	2 cameras in connection	3 cameras in connection	4 cameras in connection
Cross				
PBP				

If there are three connected cameras, they will be displayed in a 4-grid layout, with one grid showing a black screen.

	Crop On	Crop Off
Crop		

### 3.6 Start Video Output

Click to output the camera images to HDMI or UVC devices

<Note> Choose only either HDMI/UVC output. For setting the Output Mode, please refer to [3.5 Video Output Setting](#)

### 3.7 Information

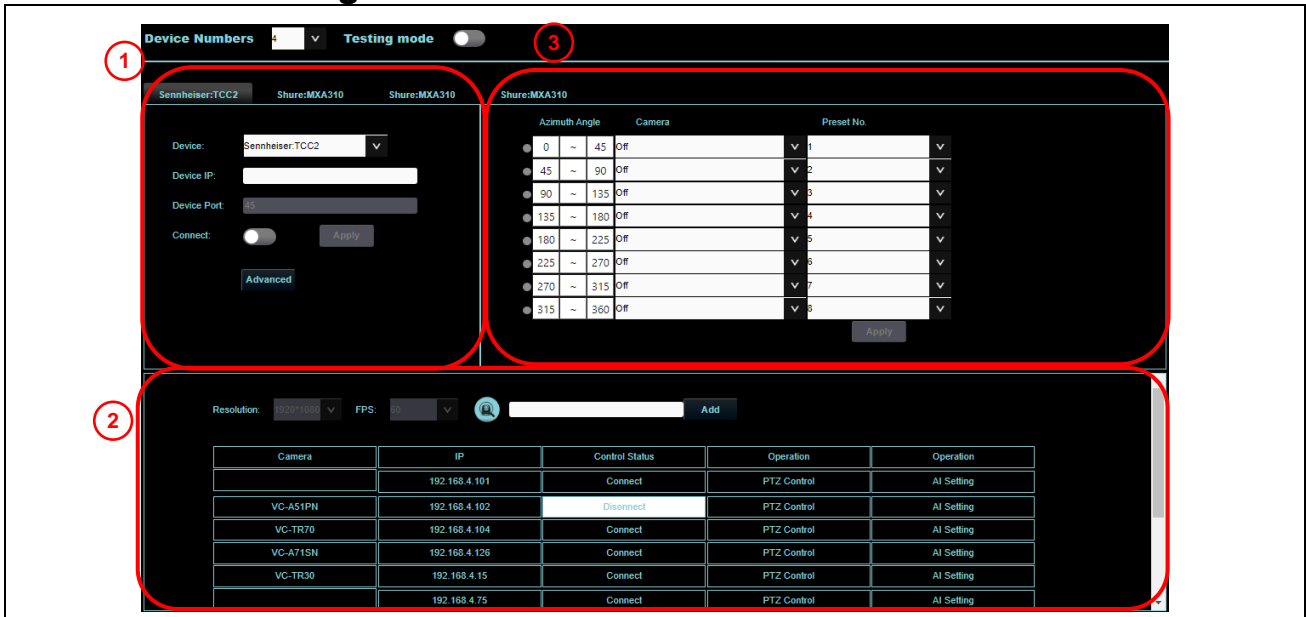

#### Function Descriptions

This window displays the software version information of AI-Box1. Click on **Check** to confirm the latest version and updates

For technical support, please scan the QRcode on the right.

# Chapter 4 Web Page Function

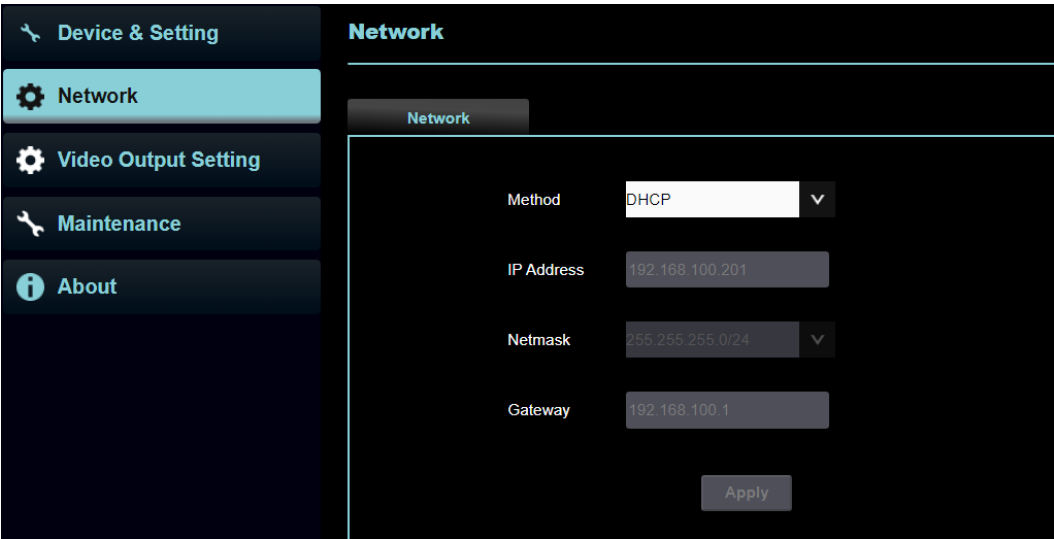

## 4.1 Device Setting

No	Item	Function Descriptions
1	Device & Setting	<ul style="list-style-type: none"> <li>Select the desired number of microphones to connect</li> <li>Devices: Select Microphone Device</li> <li>Device IP: Enter the IP address of the microphone</li> <li>Port: Display based on the connected devices                             <ul style="list-style-type: none"> <li>Shure: 2202</li> <li>Sennheiser: 45</li> <li>Nureva: 8931</li> </ul> </li> <li><b>&lt;Remark&gt;</b> Only Nureva allows customized input of PORT</li> <li>Connect: Enable/Disable microphone connection</li> <li>Advanced: Advanced Function Settings</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p>Audio Trigger Level &gt; dB: <input type="text" value="-55"/></p> <p>Time to Trigger Preset: <input type="text" value="1.5 Sec"/> ▼</p> <p>Back To Home times: <input type="text" value="10 Sec"/> ▼</p> <p>Back To Home Position: <input type="text" value="Home"/> ▼</p> </div> <ul style="list-style-type: none"> <li>Audio Trigger Level &gt; dB: Triggered only if audio source exceeds the preset dB</li> <li><b>&lt;Remark&gt;</b> For Sennheiser/Nureva only</li> <li>Time To Trigger Preset: Audio Reception Delay Settings. When a second sound trigger occurs, there will be a delay in calling the preset position based on the configured duration in seconds.</li> <li>Back To Home Time: Back To Home Time Settings. If there is no audio input at the venue, it will trigger, after the set seconds, and return to Home.</li> <li>Back To Home Position: Home Position Setting</li> </ul>

2	Camera & Control Status	<ul style="list-style-type: none"> <li>▪ Resolution/FPS: Resolution/FPS Settings (must match the camera output settings)</li> <li>▪ Refresh: Perform a device search again</li> <li>▪ Add: Manually enter the specified ip address and click on <b>Add</b> to add</li> </ul> <p><b>&lt;Remark&gt;</b> Please ensure that the camera and AI-Box1 are on the same network segment.</p> <ul style="list-style-type: none"> <li>▪ Connect/Disconnect: Click <b>[Connect]</b> to establish a connection with the camera or / <b>[Disconnect]</b> to cancel the connection</li> </ul> <p>The connected camera will be highlighted in white</p> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th style="width: 50%; background-color: #cccccc;">Disconnected</th> <th style="width: 50%; background-color: #cccccc;">Connected</th> </tr> </thead> <tbody> <tr> <td style="background-color: #333; color: #00aaff; padding: 5px;">Control Status</td> <td style="background-color: #333; color: #00aaff; padding: 5px;">Control Status</td> </tr> <tr> <td style="background-color: #333; color: #00aaff; padding: 5px;">Connect</td> <td style="background-color: #fff; color: #00aaff; padding: 5px;">Disonnect</td> </tr> </tbody> </table> <ul style="list-style-type: none"> <li>▪ PTZ Control: Click to access the camera's webpage settings Default username and password: admin/999 Please refer to the camera user manual for function description</li> <li>▪ AI Setting: Enable/Disable AI People Tracking <ul style="list-style-type: none"> <li>➢ Center Stage: After triggering to the preset position, the tracked person will be positioned in the center of view and tracking will stop after 5 seconds</li> <li>➢ Continuous Tracking: The system will continuously track a person and keep them positioned in the center</li> </ul> </li> </ul>	Disconnected	Connected	Control Status	Control Status	Connect	Disonnect
Disconnected	Connected							
Control Status	Control Status							
Connect	Disonnect							
3	Device & Camera mapping	<ul style="list-style-type: none"> <li>▪ Indicator: This indicator shows the status of microphone signal reception. (A green light indicates successful reception)</li> <li>▪ Array No. / Azimuth Angle: <ul style="list-style-type: none"> <li>➢ Array No.: For Shure models:</li> <li>➢ Azimuth Angle: Applicable to Sennheiser, Nureva, and Yamaha models. The angle can be manually adjusted</li> </ul> </li> <li>▪ Camera: Select the desired camera from the dropdown menu</li> <li>▪ Preset No.: Select the preset position for the camera from the dropdown menu</li> </ul>						

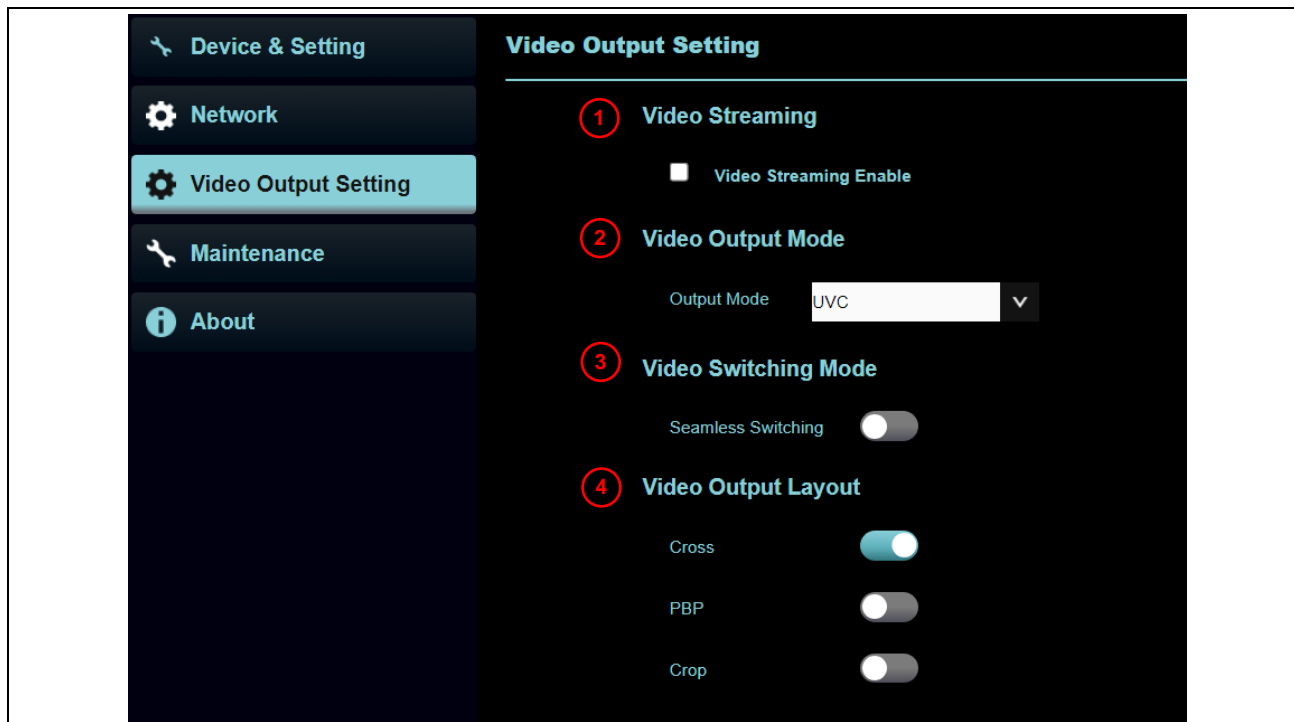

## 4.2 Network

**Function Descriptions**

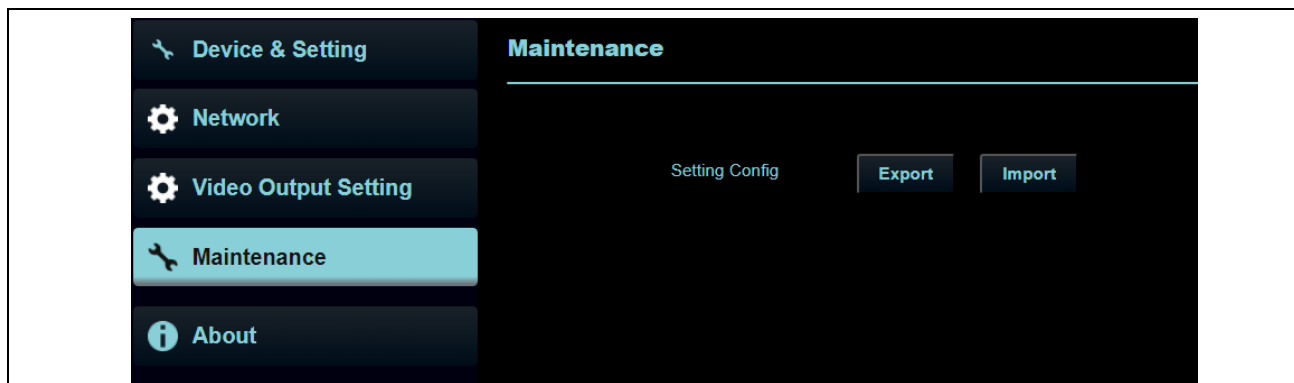

Ethernet Setting. When it is set to Static IP, the setting can be modified. Once the settings are completed, click Apply.

### 4.3 Video Output Setting

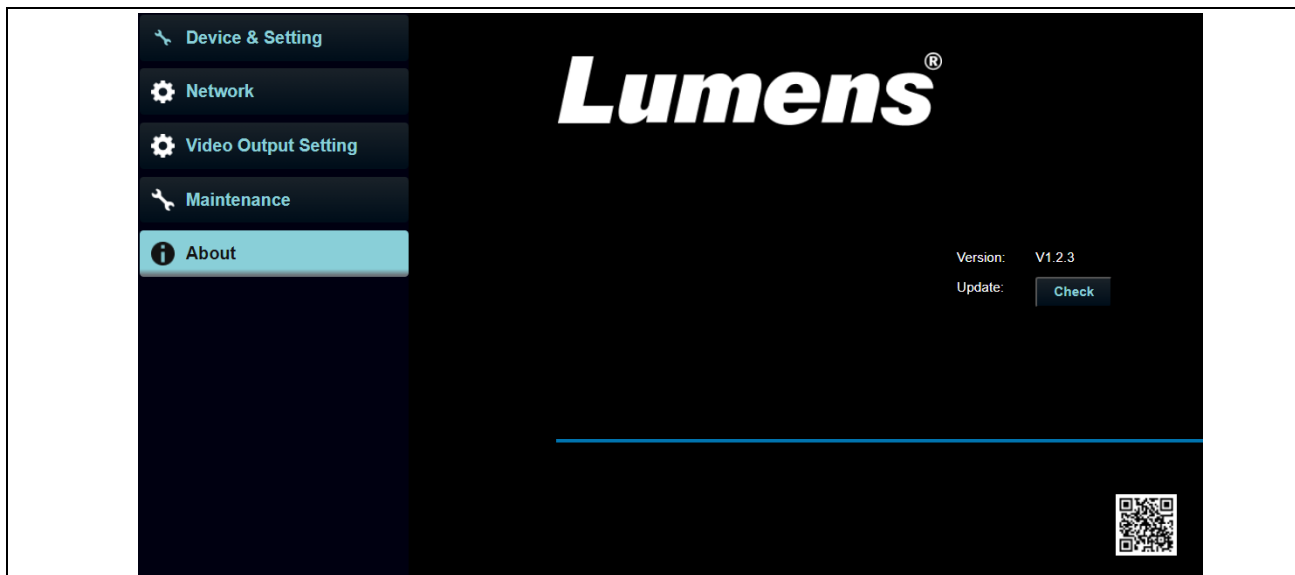

No	Item	Function Descriptions
1	Video Streaming	Enable/disable the camera image output
2	Video Output Mode	Set the Output Mode to either UVC or HDMI
3	Video Switching Mode	Enable/disable the microphone connection function The system is set up for single screen output, and the screen switching is triggered by the microphone signal.
4	Video Output Layout	Configure the layout of the video output according to the provided reference in section <a href="#">3.5.1 Video Output Layout</a> <ul style="list-style-type: none"> <li>▪ Cross: 4-split screen</li> <li>▪ PBP: Picture by Picture screen</li> <li>▪ Crop: Screen cropping function</li> </ul> <b>&lt;Remark&gt;</b> Choose either Cross/PBP only

### 4.4 Maintenance

Function Descriptions	
Users can Export/Import AI-Box1 configuration parameters	

## 4.5 About

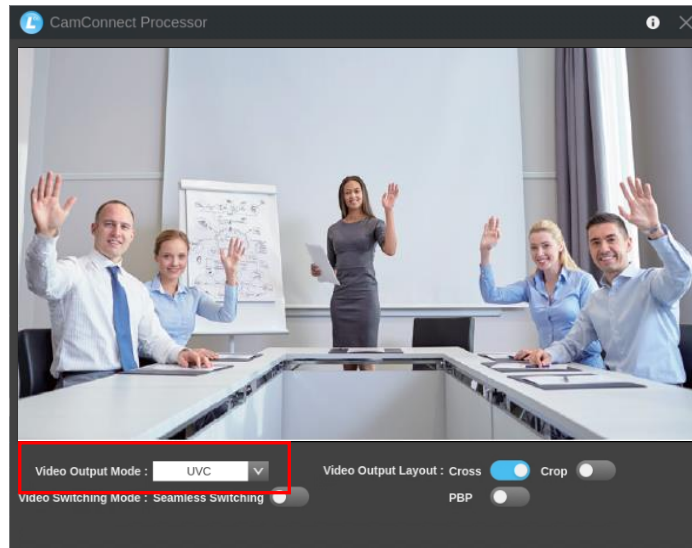

### Function Descriptions

This window displays the software version information of AI-Box1. Click on [Check](#) to confirm the latest version and updates

For technical support, please scan the QRcode at the bottom right

# Chapter 5 Connect to a conference video software

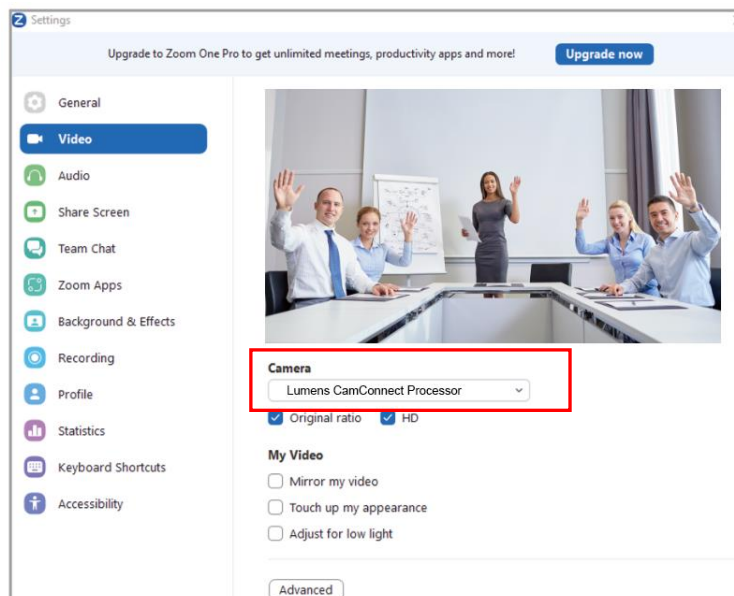

## 5.1 Set the output mode of AI-Box1 to UVC and click the start streaming option

## 5.2 Launch a video software like Skype, Zoom, Microsoft Teams, or other similar software

### 5.3 Choose the video source, to output camera images

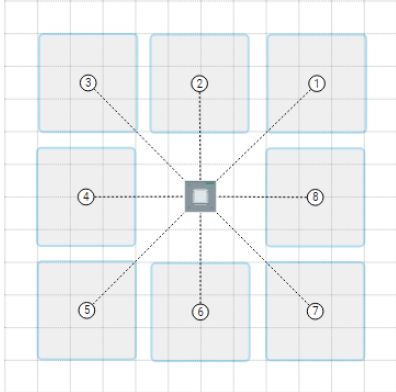

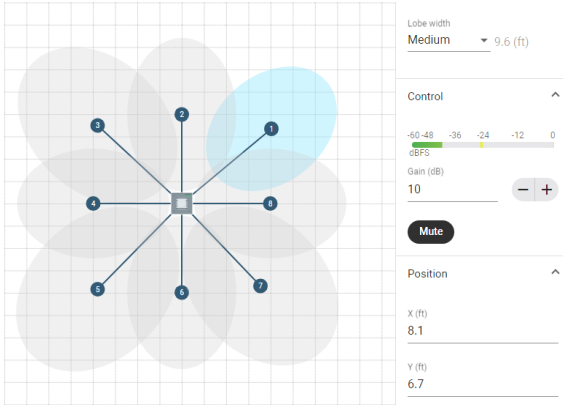

- Video Source Name: Lumens CamConnect Processor

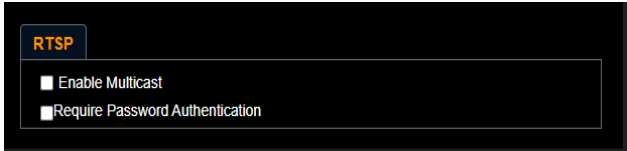

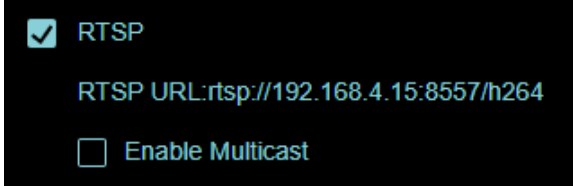

# Chapter 6 Troubleshooting

This chapter describes problems you may encounter while using AI-Box1. If you have questions, please refer to related chapters and follow all the suggested solutions. If the problem still occurred, please contact your distributor or the service center.

NO	Problems	Solutions
1.	Unable to search camera devices	1. Check the power supply of camera or PoE power supply is stable. 2. Make sure the PC is connected to the camera with the USB cable 3. Replace the cables and make sure they are not faulty
2.	No response from the microphone detection position	Please confirm that the microphone device is in Connect status
3.	When using with a Sennhesier microphone, no response at the specific angle	1. Make sure the Azimuth Angle settings in the CamConnect software include that angle position 2. Make sure if the angle is set as the forbidden area on Sennhesier Control Cockpit software. Refer to <a href="#">3.2 Sennhesier Microphone System</a> for details.
4.	When setting camera preset positions, if the microphone detects signals from other directions, it may cause the camera to move to other positions, thus interrupting the setting	Please refer to <a href="#">3.1 Microphone Setting</a> to enable the Setting mode Once enabled, the microphone can receive signals, but it will not trigger the camera to the preset position
5.	Used together with Shure TCC2 microphone. Sound detection not sensitive, not accurate	Suitable for large-area positioning when Shure Designer Automatic coverage is On.  If more accurate positioning is required, it's suggested to disable Automatic coverage, adjust Gain value/Position manually, reduce beamforming angle, to achieve more accurate positioning 

<p>6.</p>	<p>Unable to connect camera.</p>	<p>Please access to camera Webpage and go Network tab. Then, make sure if Multicast is disable. When Multicast is opened, the AI-Box would not be able to connect the camera.</p>  
<p>7.</p>	<p>Cannot upgrade firmware by OTA.</p>	<ol style="list-style-type: none"> <li>1. Please check if you are using static IP.</li> <li>2. Turn to DHCP and try update again.</li> </ol>
