1. Packing List

When opening the box, please find all included accessories:

WanderCam

Aluminum base

USB Cable

USB Wireless Lan

Certification

Flash Driver

2. Getting to know your QPC55W

The QPC55W has a built in 8 mega pixel auto focus camera, microphone, LED lights, a rotating arm, and a removable magnetic base. The camera can be connected by both a USB cable and direct Wi-Fi connection to the computer.

- Camera: 8 Mega pixel, auto focus
- LED lights: To turn on the LED light, tap the button on top of the document camera.
- Rotating arm: 270 degrees of rotation for use as document camera and web

camera.

- Base: Aluminum alloy with magnet built in. Can be removed for transportation.
- USB cable connection and WIFI connection
- Built-in microphone

3. Software Instruction

“QView Wireless” is a document camera software. The main functions include camera display, split screen, capture, record, and file manager.

4. Installation Instruction

4.1 Wireless network card installation

(1) Insert the external wireless network card into the computer.

(2) The computer will automatically recognize the network card without installing a driver. If the computer cannot recognize the network card, you need to install the network card driver.

Installation method: Open "My Computer", you will see the "CD Drive: xxx". Click it and select "setup" to install.

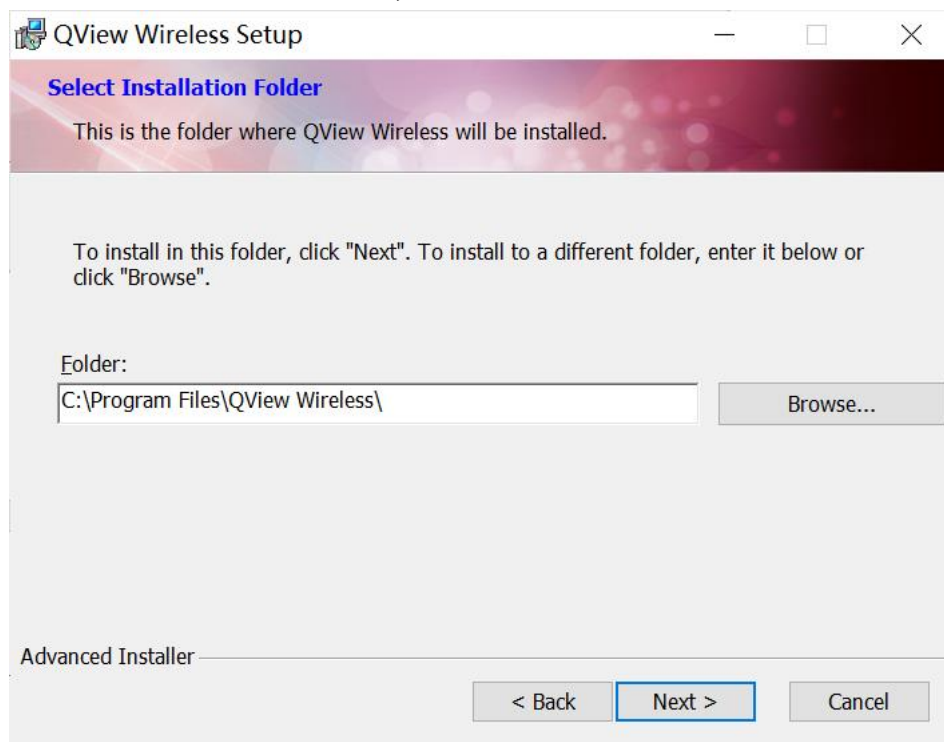

4.2 Software installation

Install “QView Wireless” on the computer through the software installation package found on USB drive or from QOMO website. Follow the setup wizard to install. As show in Pic 4-1.

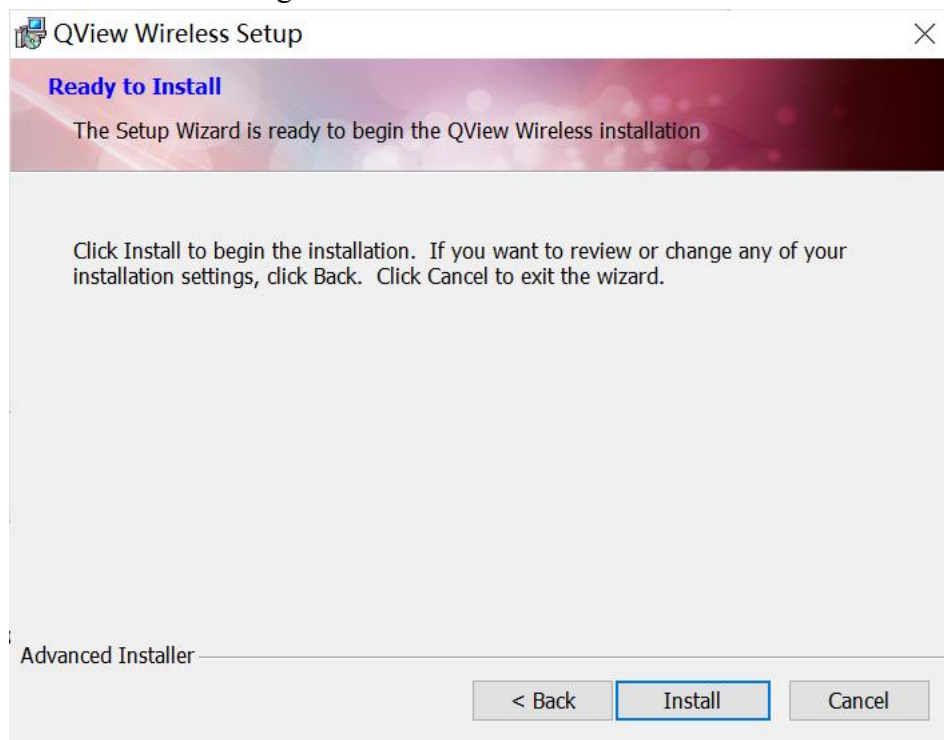

Pic 4-1

You can select the installation folder, as show in Pic 4-2

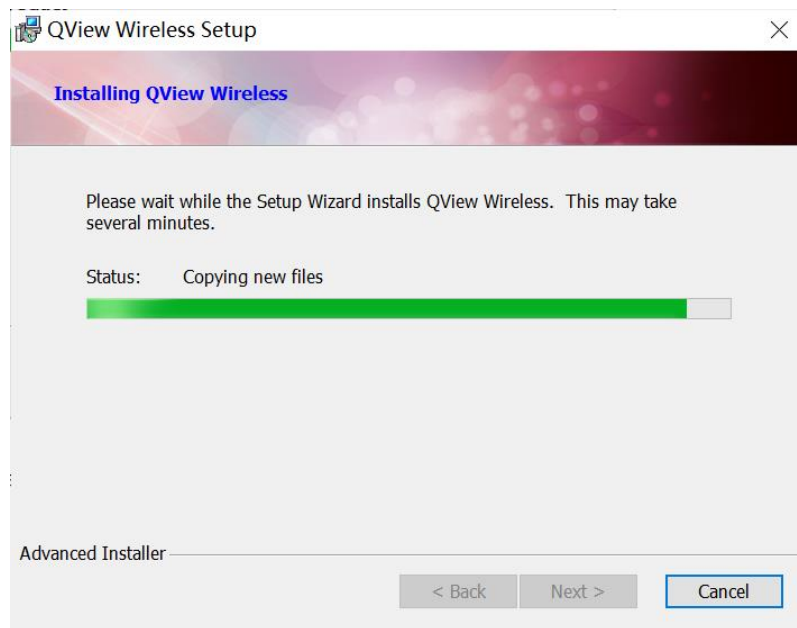

Pic 4-2

Click "Install" button to begin the installation. As show in Pic 4-3

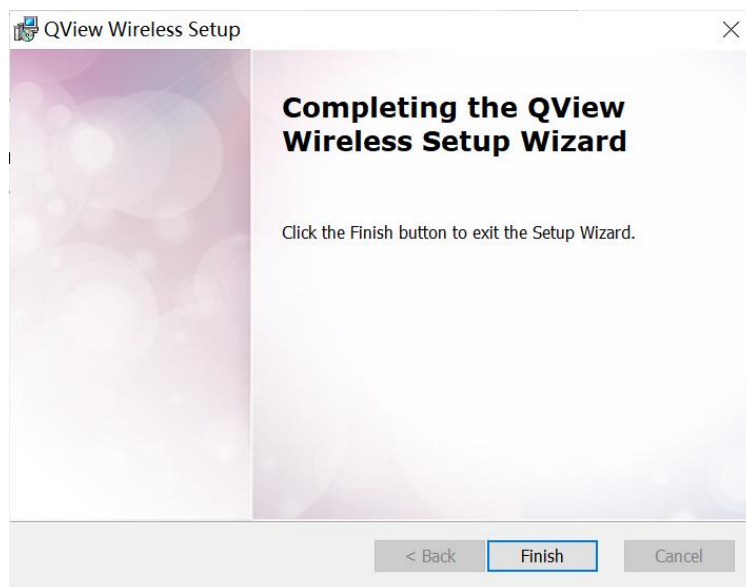

Pic 4-3

Allow several minutes for the installation process. As show in Pic 4-4

Pic 4-4

When finished you will see the window shown in Pic 4-5

Pic 4-5

The desktop automatically creates a shortcut icon of "QView Wireless" after installation is complete, as shown in Pic 4-6.

Pic 4-6

5. Connect to WanderCam QPC55W

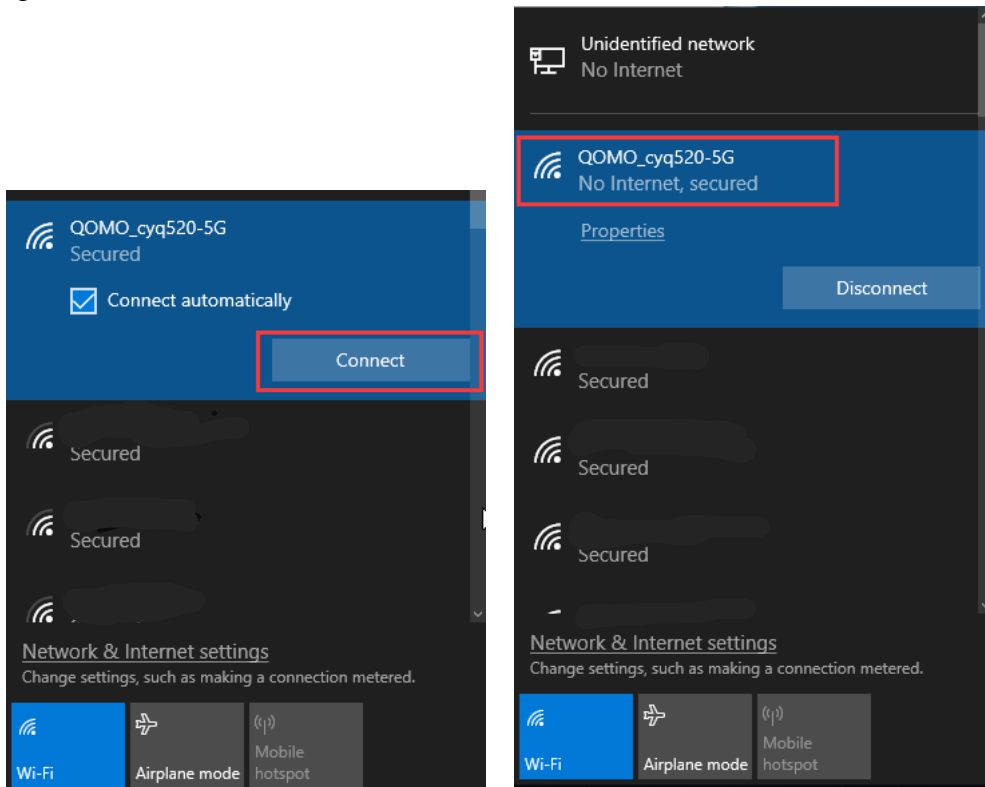

5.1 Wireless Connection

- (1) Press and hold the power button for 2 seconds to turn on or off.
- (2) After about 10 seconds of powering on, find the Wi-fi signal of the device on your computer shown in Pic 5-1. Connect to the device, the Wi-Fi name and password are found below.

WIFI name: QOMO-*****-5G,

Password: 12345678.

If you change the password and forget the modified WIFI name or password, you can insert a thin steel pin into the reset hole under the charging port of the device and press and hold the built-in switch for 8 seconds to restore to the default factory settings.

Pic 5-1

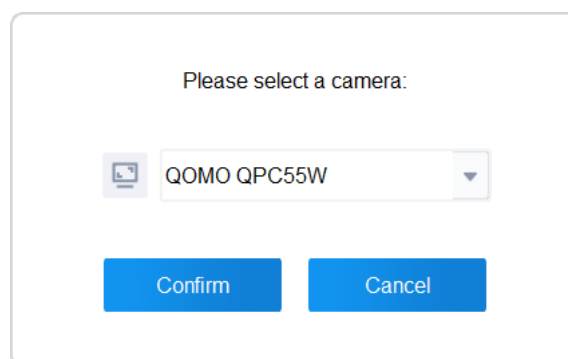

5.2 Wired Connection

When the USB cable is plugged in and connected to the computer, the WanderCam 55W automatically goes into wired mode, As shown in Pic 5-2.

Pic 5-2

You can also select wired and wireless devices by clicking the Camera button. If the USB cable is not connected, the Wi-Fi camera will be displayed by default, as shown in Pic 5-3.

Pic 5-3

5.3 Light Indicator Description

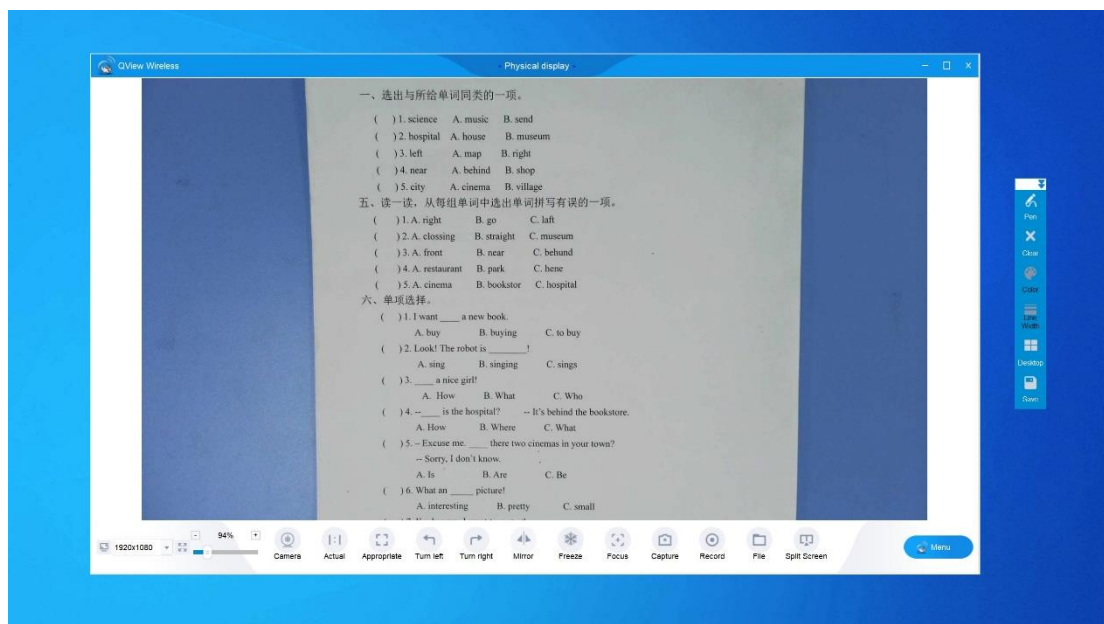

The camera has a blue light when powered on in wireless mode. The camera has a green light when it is connected to the computer through USB mode. After unplugging the USB cable, the device will automatically go into wireless mode.

When charging with the power adapter, the light indicator will be red, and when the camera is fully charged, it will illuminate green. When the power is low, the light will

turn red and the device will power off within half an hour.

6. Software Function

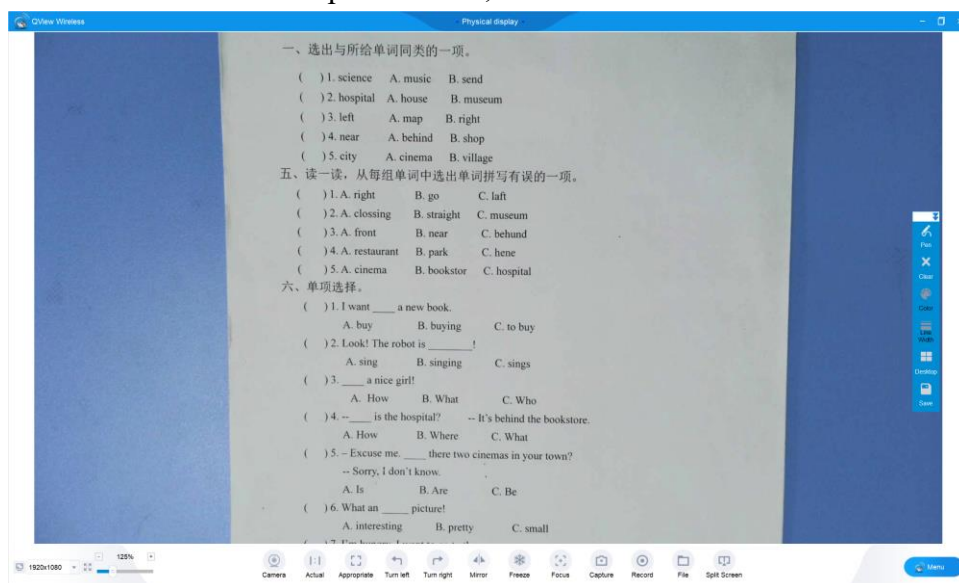

Double-click the desktop icon to open the software to display your camera, as shown in Pic 6-1.

Pic 6-1

6.1 Physical display

The user can display content in the display area and utilize features in the lower toolbar to achieve an interactive presentation, shown in Pic 6-2.

Pic 6-2

When the device is not connected, the upper left corner displays "No signal..."

Resolution: The resolution menu automatically displays the resolution value of the device after connecting the device. Click to display the resolution menu, as shown in Pic 6-3, select a different resolution, and the size and clarity of the display screen will change accordingly. For regular use, 1920x1080 is recommended.

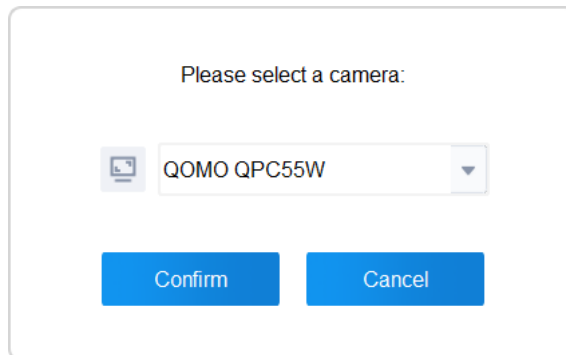

Pic 6-3
