VisualM iPad APP

After IP control box and HDMIoverIPConsoler software settings, now users can use the **"VisualM" iPad APP** to control the this AV over IP system, users can download the APP by searching "visualM" in the App Store:

The 1st time to use this **VisualM iPad APP** will need to start from clicking "Change settings", but before this changes will need to make sure this iPad is connected to the same network from the AV over IP system.

Then click "Advanced settings", the password is "admin"
